Dr Andrea Geiss

Geiss, A., Varadi, E., Steinbach, K., Bauer, HW, Anton, F. (1997). Psychoneuroimmunological correlates of persisting sciatic pain in patients who underwent discectomy. *Neuroscience Letters*, 237(2-3), 65-68

Geiss, A. (2002). *Psychoneuroimmunologische Untersuchungen bei Patienten mit postoperativ anhaltenden radikulären Beschwerden* (254 Aufl.). Göttingen: Cuvillier.

Geiss, A., Rohleder, N., Kirschbaum, C., Steinbach, K., Bauer, H.W., Anton, F. (2005). Predicting the failure of disc surgery by a hypofunctional HPA axis: evidence from a prospective study on patients undergoing disc surgery. *Pain*, 114(1-2), 104-117.

Comment in: Eliasson, T. (2005). Heredity and psychology predict the result of herniated disk surgery [Ärftlighet och psykologi styr resultat av diskbråckskirurgi] *Lakartidningen* 102 (50), 3864-3866

Geiss, A., Larsson, K., Rydevik, B., Takahashi, I., Olmarker, K. (2005). Autoimmune properties of nucleus pulposus: an experimental study in pigs. *Spine*, Volume Suppl. p. 15
Verfügbar unter

<http://journals.lww.com/spinejournalabstracts/toc/2005/00030>

Takahashi I., Murata, Y., Rydevik, B., Geiss, A., Larsson, K., Kikuchi, S., Olmarker, K. (2005). Interactions between inflammatory cytokines derived from nucleus pulposus: an analysis based on pain behavior of rats. *Spine*, Volume Suppl. p.14. Verfügbar unter:

<http://journals.lww.com/spinejournalabstracts/toc/2005/00030>

Geiss, A., Rohleder, N., Anton, F. Does a disturbed HPA axis function require enhanced IL-6 levels? (2006) Evidence from a psychoneuroimmunological study in fibromyalgia patients. *Brain, Behavior, and Immunity*, 20 (3), 23-24.

Geiss, A., Larsson, K., Takahashi, I., Rydevik, B., Olmarker, K. (2007). Autoimmune properties of nucleus pulposus: an experimental study in pigs. *Spine*, 32(2), 168-173. **Featured in this issue.**

Geiss, A., Steinbach, K., Bauer, H.W., Anton, F. (2008). Untersuchung zur Eignung der Reaktivität des Interleukin-6 Spiegels zur Früherkennung postoperativ anhaltender radikulärer Schmerzen. *German Medical Science*, 610,15-17.

Geiss, A., Steinbach, K., Bauer, H.W., Anton, F. (2009). Glukokortikoidresistenz zirkulierender Monozyten als eine Ursache von Therapieversagen nach Steroidinjektion: Ergebnisse

einer prospektiven Studie. *German Medical Science*, 612, 21-23.

Geiss, A., Larsson, K., Junevik, K., Rydevik, B., Olmarker, K. (2009). Autologous nucleus pulposus primes T cells to develop into interleukin-4-producing effector cells: An experimental study on the autoimmune properties of nucleus pulposus. *Journal of Orthopaedic Research*, 27(1), 97-103. **Featured in this issue.**

Geiss, A., Delank, K.S., Sobottke, R., Springorum, H.P., Michael, J.W., Schlueter-Brust, K., Eysel, P. (2010). Sequestered intervertebral discs are mainly infiltrated by dendritic cell precursors: evidence from a prospective study on patients undergoing microdiscectomy. *Spine*, Volume Suppl (Affiliated Spine meeting Abstracts), pp. 113.

Geiss, A., Delank, K.S., Sobottke, R., Springorum, H., Michael, J., Eysel, P. (2010). Eine stärkere Infiltration von sequestriertem Bandscheibengewebe mit einem bestimmten Typ dendritischer Zellen geht einher mit einem ungünstigen Genesungsverlauf nach einer Bandscheibenoperation: Ergebnisse einer prospektiven Studie. *German Medical Science*, 614, pp.325-327.

Geiss, A., Rohleder, N., Anton, F. (2012). Evidence for an association between an enhanced reactivity of interleukin-6 levels and reduced glucocorticoid sensitivity in patients with fibromyalgia. *Psychoneuroendocrinology*, 37(5), 671-684.

Comment in: Thorson, K. (2012). Are metabolic changes causing your symptoms to spiral ?. *Fibromyalgia Network*, 96, pp.14-15.

Geiss, A., Delank, K.S., Sobottke, R., Michael, J., Eysel, P. (2012). Sequestered intervertebral discs are mainly infiltrated by dendritic cells and not macrophages: Evidence from a prospective study on patients undergoing microdiscectomy. *Global Spine Journal*, 2(Suppl. 1), pp. S90-91.

Geiss, A., Sobottke, R., Delank, K.S., Eysel, P. (2016). Plasmacytoid dendritic cells and memory T cells infiltrates true sequestrations stronger than subligamentous sequestrations: Evidence from flow cytometric analysis of disc infiltrates. *European Spine Journal*, 25(5), 1417-1427.
